**Subject:** FW: Information on the WV Charleston Chemical Spill sampling data

See link below to the WV Homeland Security Website.

ALSO.....I found the Eastman toxicologist's name....

Ex. 6 - Personal Privacy

I went back and reviewed old emails. I could not find his name as a recipient of an email from me or my receiving an email from him. Looks like I did not trade emails with him but we merely talked on the phone once or twice. I have an email from ATSDR Region 3's Lora Werner that she sent to several other individuals forwarding three emails from Steve Green to another ATSDR employee in Atlanta.

The three emails have the proprietary toxicological studies as attachments.

I received your email asking for "copies of the results of tests on water in Charleston West Virginia for 4 methyl 1-cyclohexanemethanol, which spilled into the water supply a week ago."

Sampling data is available on-line, on the West Virginia Division of Homeland Security and Emergency Management webpage. The link is:

[www.dhsem.wv.gov/Pages/WV-American-Water-Emergency.aspx](http://www.dhsem.wv.gov/Pages/WV-American-Water-Emergency.aspx)

If the link doesn't work, go to the [www.dhsem.wv.gov](http://www.dhsem.wv.gov) homepage and click on the glass of water image that says "Water Do Not Use Emergency." You may have to wait for the image to pop up.

**Don't** click on the red text box above it that says WV America Water Kanawha Valley Customers." That will take you to the water company's site.

The WV Homeland Security webpage has a lot of information and documents related to the chemical spill, including flushing guidelines, sampling data, health advisories, and more.

I hope this is helpful. Please feel free to contact me if you have additional questions. Thank You.

Sincerely,

Trish Taylor
